

Name of product : Bike Buddy Notification System

Researcher details

i) Name : Syarilla Iryani Binti Ahmad Saany, Irma Shayana Samaden, Muhammad Azfar Dhakyudheen

ii) Email : syarilla@unisza.edu.my

iii) Contact no. : 013-9304422

Faculty : FIK

Cluster/Area of study : IT

Status of the product : Prototype

Product description :

Bike Buddy Notification System is a mobile web based system that can assist the motorbike users whenever the problems to the motorbikes occur. The system provides services in terms of connecting motorbike users to the workshops via mobile devices. The system can identify the current location of the users and provide a list of nearby workshop. Apart of that, the workshop can also accept the user's requested services or otherwise. Satisfaction of the services provided can be rated for the benefits of others.
